

CLAM ~ Airtight Glass Showcases

CLAM is an all glass Lift-off Top Showcase System with Abloy locking that provides a variable level of security depending on your requirements and minimal visual obstruction. The level of security required will effect the type of **CLAM** case that is needed and specifications will vary accordingly. The specifications for

the basic **CLAM** showcase with moderate level security features are as follows:

- METAL WORK:** Aluminium alloy powder coated in one of our standard colours.
- GLASS:** Structural Panels: 6.38mm laminate conforming to AS1288-1994 and absorbing up to 99% of UV radiation (wavelengths from 320 to 380 nanometres).
- SEALS:** Extruded silicone seals adhered to glass edges with Dow Corning 7091 alcohol release silicone. Sealant (light grey) and nylon. Conformable brush seals – grey.
- FABRIC:** Baumann Ultra 98 range affixed with water based adhesive.
- BASEBOARD:** 12mm MDF sealed with water based 'Isolate' sealant.
- NOTE:** Clam – S sizes are limited due to top access. Other Clam versions are available.
- LOCKS:** Extractable Abloy CL291 or CL291E locks, individually keyed. Locks will be located in the long sides of the case unless specified to the contrary.
- CONTROLS:** (Optional) Passive environmental control in the form of a silica gel system concealed within the plinth and accessible via opening/removable plinth fascia and lockable flap door.
