

New & Improved Pivot Hinge Range

NEW Multi-fit Design

PVD Finish

We have discontinued our mild steel & brass range and have replaced our entire stock with Stainless Steel pivots, available in every style and finish.

Our NEW range has been improved with elongated holes and extra fixing points on our new multi-fit pivot.

By using our stainless steel range, any fears you may have of rusting, peeling or colour changes are eliminated.

With our NEW complete stainless range you can sell & install with confidence

We have replaced our nickel plate range with polished stainless steel (PSS), our satin chrome range with satin stainless steel (SSS), and our electroplated brass by a process of physical vapour deposition (PVD) of titanium nitride onto stainless steel, which results in a dense coating with outstanding resistance to wear & consistency of colour.

At the one price of **\$7.50** + GST per set for any style and finish, starting on 1st February, 2006.

DON'T BUY MILD STEEL BUY STAINLESS
